

## Settings for Best Viewing of Nwas Aerial Imagery

Nwas imagery is unsigned integer, 8 bit pixel depth, color red, green, blue (RGB), tif format, compressed with LZW.

1. Open image properties.
2. Select the Symbology tab.
3. Check the display background value, 0,0,0.
4. Set stretch type to "None".
5. Uncheck "Apply Gama Stretch".
6. Select OK.
